🔗 LeetCode

📋 OBJECTIVE

Software Engineer with a strong foundation in data structures, algorithms, and object-oriented programming. Experienced in .NET core, backend development with a keen interest in LLM and AI. Currently contributing to R&D at Onnorokom Projukti Limited, bringing a problem-solving mindset backed by 700+ competitive programming solutions.

📁 EXPERIENCE

06/2025 – Present	Assistant Software Engineer (R&D) <i>Onnorokom Projukti Limited</i> ⓘ - Developed and maintained backend services using C# and ASP.NET ⓘ Core - Collaborated with cross-functional teams to design and implement RESTful APIs - Researched and prototyped LLM-based solutions including RAG pipelines and knowledge graph integration	Dhaka, Bangladesh
01/2025 – 02/2025	Event Coordinator <i>Bitfest KUET</i> ⓘ	Khulna, Bangladesh

🎓 EDUCATION

01/2020 – 10/2025	Bachelor of Science in Computer Science and Engineering <i>Khulna University of Engineering & Technology, KUET.</i> ⓘ CGPA: 3.42 (out of 4.00)	Khulna, Bangladesh
01/2017 – 12/2019	Higher Secondary Certificate <i>Khulna Public College</i> ⓘ GPA: 5.00 (out of 5.00)	Khulna, Bangladesh

🧠 SKILLS & INTERESTS

Programming Language

C++, C#, Java, python

Tools & Platforms

Docker, Git, GitHub, GitLab

Frameworks & Technologies

ASP.NET Core, RESTful API Development

Databases & Cloud

PostgreSQL, MySQL, Oracle DBMS, Firebase

Version Control

Git, GitHub, GitLab

Areas of Interest

.NET Core, Scalable Backend Systems, Software Architecture, LLM-based RAG Systems, Knowledge Graphs

📁 PROJECTS

01/2026 – Present	CAB management system - ASP.NET ⓘ <i>CAB management system is a full-stack web application developed using C#</i> - Tools & technologies used: C#, ASP.NET - The web project is based on ASP.NET Core MVC.
06/2025 – 08/2025	Media Converter like AWS - ASP.NET <i>Project desktop application featuring media conversion with different resolution while achieving original quality.</i> - Tools & technologies used: C#, MySQL, JWT, Axios, AWS s3, Worker - This project mainly focuses on video streaming feature.
04/2026 – Present	HTML to PDF converter - ASP.NET ⓘ <i>A high-performance HTML to PDF converter built with .NET 8 — no browser engine, no WebKit, no Chromium.</i> - Tools & technologies used: C#, ASP.NET core - It Converts HTML with CSS styling and LaTeX math formulas to vector PDF
10/2025 – Present	Advance RAG - Local LLM based QA system ⓘ <i>A powerful Retrieval-Augmented Generation system with Knowledge Graph capabilities</i> - Tools & technologies : Knowledge graph, Vector embedding, Semantic search, Cross encoder re-ranking - This project focuses on Academic Question Answering system with hallucination reduction
10/2024 – 01/2026	Chat bot - LLM based assistant ⓘ <i>AI RAG Chatbot with Full Duplex Voice & Email Notifications</i> - Tools & technologies used: Vector embedding, FAISS Vector Store, BM25 Hybrid Search - Retrieval-Augmented Generation (RAG) chatbot with full duplex voice conversations, email notification.

</> PROBLEM SOLVING

- LeetCode 100+ Solved Problems

- CodeChef & Codeforces 600+ Solved Problems ⓘ

🏆 ACHIEVEMENTS

03/2026	Introduction to Model Context Protocol - Anthropic ⓘ
04/2025	Software Engineer – HackerRank ⓘ
